            A psychiatric assessment with Dr. Adam Brandemihl is an
            approximately forty-five minute appointment, utilizing a
            bio-psycho-social approach to establish a probable diagnosis and a
            recommended treatment plan.  Prior to the appointment
            the patient is encouraged to fill out an 'Intake Form&quot; either at the
            office or downloaded from the website. Dr. Brandemihl provides his
            clients with all the medical and psychological information necessary
            to allow them to make their own informed medical decisions regarding
            treatment options such as psychotropic medication and/or
            psychotherapy.</p>
          <p class="auto-style1"><a href="#top">Top</a></p>
          <p class="auto-style1"><img src="images/medicationmanag_header.jpg" alt="Medication Management" width="427" height="29" /><a name="medicatio
            Medication Management appointments are approximately fifteen minute
            appointments designed for you and Dr. Brandemihl to evaluate how you are
            responding to your current medication(s). After reviewing the
            symptoms that have occurred since your last appointment, you and Dr. Brandemihl will decide if it is best to add, stop, or adjust a
            medication to help you achieve your own mental health goals. The
            length of time between medication management appointments can vary
            from one week to six months depending on the stability of your
            illness and the particular medication(s) you are taking.</p>
          <p class="auto-style1"><a href="#top">Top</a></p>
          <p class="auto-style1"><img src="images/medmanag_psych_header.jpg" alt="Medication Management and Psychotherapy" width="428" height="29" /><a
            These appointments are all-inclusive and range from thirty to sixty
            minutes. They allow you and Dr. Brandemihl to use the complete
            bio-psycho-social treatment approach to help improve your general
            sense of well being. During these sessions he is able to address your
            biochemical needs through medication adjustments and also utilize
            psychotherapy to improve and alleviate the psychosocial stressors in
            your life. Dr. Brandemihl is trained in a variety of
            psychotherapeutic modalities but prefers psychodynamic, supportive
            and cognitive behavioral therapy.</p>
